

LOGAN ABSTRACT: NANOGREENS¹⁰ LOWERS BLOOD PRESSURE!

A Logan Chiropractic College research study designed to study the effects of NanoGreens¹⁰ on blood pressure was presented at the Association of Chiropractic Colleges (ACC) meeting in Phoenix, AZ, March 17th, 2007. The study was done on forty subjects, of which half were controls.

After taking the supplement for 90 days, (two scoops daily) both the systolic and diastolic blood pressure decreased significantly. On average, the systolic blood pressure decreased 12.4 mm Hg and the diastolic blood pressure decreased 7.1 mm Hg. No significant blood pressure decrease was observed in the control group.

These pilot study results are greater than those reported for the DASH diet, low sodium diet and exercise combined!

"PATIENTS ASK ME, 'HOW CAN I GET MORE?!'"

"I initially ordered the product for myself. I was so impressed with the way it made me feel that I started recommending it to my patients who hated taking supplements three or four times a day. Once my patients feel the benefits, they ask how they can get more. Parents also love the product for those little ones who are finicky about eating their fruits and vegetables, as it tastes good too. NanoGreens¹⁰ is remarkable!"
