## Announcing NEW! Stemviva Neuro, Vascular and Vision Paks

BioPharma Scientific manufactures the Stemviva line of mega-vitamin/mineral nutraceutical paks for medical doctors providing autologous\* stem cell therapy embryonic) through Stemedica. As these Stemviva Neuro, Vascular and Vision Paks each consist of six or seven different supplements, taken once or twice a day. The 7-9 soft-gels and capsules are packaged together as one AM and/or one PM dose for both ease of prescription by the health professional and ease of use by the patient / client. (\* not embryonic stem cells, but taken from one's own body.)

All three of the Stemviva Paks provide the following complete mega-nutrition support:

**Multi-Vitamin Formula:** A complete, broad spectrum vitamin and mineral formula chosen specifically to support the micro-nutrient needs of individuals.

**Omega-3 EPA/DHA from Fish Oil:** These omega 3 fatty acids, especially DHA, are essential for maintenance of normal brain function throughout life. This formula is specially coated (enteric coated) to help prevent reflux.

**Vitamin E from Mixed Tocopherols:** These are powerful antioxidants to protect lipid membranes of cells, including those of the brain and nervous system, heart and great vessels, and of the eye.

**Tocotrienols:** Sourced from rice bran oil, tocotrienols belonging to the vitamin E family, along with the above tocopherols. Like vitamin E, they are strong antioxidants protecting against lipid oxidation in living cells by free radicals.

**Coenzyme Q10:** This nutrient is an especially powerful antioxidant to help protect nerve, heart and retinal cells from the aging effects of free radical damage.

**The Stemviva Neuro Pak** provides in addition to the above its Brain Formula. The Brain Formula provides special amino acids, antioxidants, phospholipids and phytonutrients, combined with herbal derivatives and extracts, that have been specifically chosen for their ability to support brain structure and function. The Stemviva Neuro Pak has been especially designed for mega dietary supplement support for those receiving stem cell therapy, usually for such disorders as stroke, dementia, paralysis, or Parkinson's disease. However, it may also be suitable for those desiring a complete mega-vitamin program that most especially supports normal nerve, brain and mental health and function.\*\*

To learn more about the Stemviva Neuro Pak formula see the [scientific white paper](#) or visit your health professional's MyBioPharmacy.com website.

**The Stemviva Vascular Pak** features Calcium & Magnesium and L-Carnitine. Extra calcium and magnesium are essential to the maintenance of normal heart and vascular muscle tone and

pressure. L-Carnitine is a naturally occurring amino acid derivative. L-Carnitine helps cells burn long chain fatty acids to supply energy for the heart muscle and thereby may also help support normal healthy blood lipid levels. The Stemviva Vascular Pak has been especially designed for mega dietary supplement support for those receiving stem cell therapy for repairing damage and restoring diminished functions related to cardiovascular disorders. However, it may also be suitable for those desiring a complete mega-vitamin program that most especially supports cardiovascular and pulmonary health and normal function.\*\*

To learn more about the Stemviva Vascular formula see the [scientific white paper](#) or visit your health professional's MyBioPharmacy.com website.

**The Stemviva Vision Pak** features the Ocular Formula. The amino acids, minerals, antioxidants and phytonutrients in this formula have been specifically chosen for their ability to support eye health. The Stemviva Vision Pak has been especially designed for mega dietary supplement support for those receiving stem cell therapy for repairing damage and restoring diminished visual functions related to retinal eye diseases like macular degeneration and diabetic retinopathy. However, they may also be suitable for those desiring a complete mega-vitamin program that most especially supports eye health to help maintain normal visual function lifelong.\*\*

To learn more about the Stemviva Vision Pak formula see the [scientific white paper](#) or visit your health professional's MyBioPharmacy.com website.

**Instructions:** Take one package (Pak) twice a day with meals unless otherwise instructed by your health professional. Do not exceed recommended dosage unless recommended by your health professional. When using nutritional supplements please inform your physician prior to surgery or if taking prescription medications. Do not take if pregnant or lactating unless otherwise directed by your physician. Keep out of reach of children.

All StemViva Neuro, Vascular, and Vision Support System Paks are designed to work most optimally when taken with NanoGreens<sup>10</sup>, *Fruits and Vegetables to the Power of 10* and NanoPro<sup>PRP</sup>, *Whey Protein with Colostrum Peptides* from BioPharma Scientific. To learn more how to best enjoy and employ these all natural functional food drink mix powders, see BioPharma's "The Super Food Solution™ User's Guide".

## Cleveland Browns Stars Testify!

"The NFL season is a grind and it is hard to stay energized — not while taking NanoPro + Nano Greens — I felt re-energized and gained lean muscle tissue and lost fat throughout the course of the season."

- *Derek Anderson, QB, the Cleveland Browns*

Photo by John H. Reid III

"During my NFL career, I've tried many different forms of protein and NanoPro is definitely the best product I've tried. I gained six pounds of muscle mass during the season and I never felt physically worn down. Additionally, because of our schedule, it's extremely difficult to eat as many fruits and vegetables, NanoGreens gave me the peace of mind that I was getting the nutrients my body required." - *Jamal Lewis, RB, the Cleveland Browns*

[I suggest that all of you start to use some of the "Lifelong Wellness Meals" starting on p. 8 of the "Super Food Solution™ User's Guide" which combines NanoGreens<sup>10</sup> and NanoPro<sup>PRP</sup> in a tasty variety of ways to support brain, heart, immune and hormonal health. You will often be impressed with the results!— Editor]

## NSF Tests Prove NanoPro<sup>PRP</sup> Safe for Athletes

Global Lifescience Solutions, LLC., an NSF International Co., has tested the first 2007 run of NanoProPRP and found it free of steroids, stimulants, diuretics, beta agonists and illegal drugs or false positive tests for same. To read the report, [click here](#).

NanoGreens<sup>10</sup> had previously received the same clearance. See that report at [www.biopharmasci.com/hp/snp/analysis.asp](http://www.biopharmasci.com/hp/snp/analysis.asp).
