

NEW NANOGREENS¹⁰ ANIMAL STUDY FROM RUSSIA

A new study on NanoGreens¹⁰ from Russia was presented at the the International Symposium, "Functional Food in Europe -International Developments in Science and Health Claims" on May 9-11, 2007, in Malta.

The study showed that NanoGreens¹⁰ significantly:

- 1) increased total antioxidant capacity in plasma
- 2) lowered triglycerides in plasma
- 3) increased detoxifying antioxidant enzymes (S.O.D.) in the liver.

We all should eat our fruits and vegetables, but when you can't, won't, or just don't it's good to know that just one serving of NanoGreens¹⁰ has the phyto-nutrition of up to 10 servings of fruits and vegetables.

Product Testimonial of the Month:

Terry Witzu, DDS
Silver Medalist 2006, Masters Heavyweight Division
Ringside World Boxing Championship

"I am 57 and have been training very hard for the Ringside World Boxing Championship in August. I plan on winning the heavyweight belt this year! I have been taking NanoGreens¹⁰ for a few months now and I have not since been afflicted by the colds and flues that usually surround my day as a practicing dental surgeon. Recently, I have felt an unusual amount of fatigue. However, after increasing my consumption of NanoGreens¹⁰ to twice daily and resting, I am feeling my strength return in just 2 days!"

"I took the convenient foil packages on holiday with me to Cuba. I consumed one package per day with six ounces of water. Despite the increase in calories and reduction in training, I emerged form the holiday without the energy lag that I usually experience. In fact my wife does not use NanoGreens¹⁰ and she felt poorly a few days after our return!"

NANOGREENS¹⁰ ORAC* = 8256 / SERVING!
(688 / GM x 12 GM)

BioPharma is the only functional food company that posts on line its *in vitro* antioxidant, microbial and heavy metals analysis on every run, noting, "from unopened, sealed container" to prevent the possibility of sending in adulterated samples for analysis.

See the Brunswick Lab's report, (4/16/07) posted here:
http://www.biopharmasci.com/downloads/MicroNG10_61647.pdf

*Oxygen Radical Absorbance Capacity

ORAC, short for *Oxygen Radical Absorbance Capacity*, is a test tube analysis that measures the total antioxidant power of foods and other chemical substances.

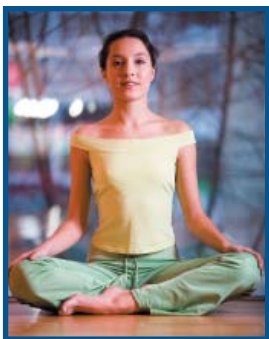

Antioxidant power is the ability to neutralize oxygen free radicals. Therefore, ORAC testing is a way to measure how many oxygen radicals a specific food can absorb. The more oxygen radicals a food can absorb, the higher its ORAC score.

Foods that score high in ORAC testing may protect cells and their components from oxidative damage. The higher a food's ORAC score, the better it is at helping our bodies fight diseases like cancer and heart disease.

NANOGREENS¹⁰: BETTER THAN DASH DIET FOR BLOOD PRESSURE?

Read Dr. Maher's article on why he believes the recent NanoGreens¹⁰ pilot study as reported in the published abstract from Logan College in the Journal of Chiropractic Education showed that NanoGreens¹⁰ supplementation may be more effective than the DASH Diet plus exercise combined!
